---

Mr. Baker:

Clarification: vertical delineation is completed. Horizontal delineation will be determined by sidewall samples. Please respond regarding remediation proposal as soon as possible.

Thanks,  
Olivia

**Subject:** RE: Corrective Action Plan 1RP-4924

Mr. Baker:

NMOCD will consider delineation completed for 1RP-4924. Please address these concerns regarding the proposed remediation plan.

1. The map does not have a scale. Please provide a scaled map with the GPS coordinates of the delineation sample locations marked and the approximate dimensions represented by each of the test trenches.
2. Please be advised that each proposed differing depths of excavation will require a set of confirmation sidewalls and bottom samples at no greater than 50 ft. apart. In other words, the border between the proposed 6 ft. excavation for SP1 area and proposed 1 ft. excavation for SP2 will require a sidewall/edge sample taken.
3. Will the proposed on site bioremediation of hydrocarbon-impacted soil entail any application of microbial solutions and/or aeration?
4. Please note that any stockpiled soil on plastic must be bermed to prevent enlargement of the impacted area.

Thanks,  
Olivia

Ms. Yu,

Attached is the Corrective Action Plan for your review. Please let me know if you have any questions or wish to discuss. Thanks and have a good day.
