**Subject:** RE: Marathon Oil Company - 1RP-5142 Closure

Good morning Ms. Karrigan:

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-5142** closed. However, this determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Like approval from NMSLO required.

Thanks,

Olivia Yu  
Environmental Specialist  
NMOCD, District I  
[Olivia.yu@state.nm.us](mailto:Olivia.yu@state.nm.us)  
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

**Subject:** [External] RE: Marathon Oil Company - 24 hour Report - Initial C141

**Beware of links/attachments.**

Good morning Ms. Karrigan:

Please ensure that one of the photos is of an exposed liner for liner integrity verification. Please note that NMOCD database indicates Fee surface and State minerals ownership.

The 1RP for this incident is

<b>5142</b>	8/2/2018	A	Marathon Oil	Angell B #2	30-025-39076	17S-36E-11B	7/12/2018
-------------	----------	---	--------------	-------------	--------------	-------------	-----------

Please see the attachment for your records. Please inspect the liner in question. It is NMOCD's understanding that all impacted material in the containment has been removed and the liner inspected for integrity. Provide NMOCD with a concise report of the inspection with affirmation the liner has and will continue to contain liquids. Pictures and a record of the removal of contaminated fill or proper disposal of liquids are strongly encouraged to accompany submission of initial C-141s.

Thanks,

Olivia Yu  
Environmental Specialist

**Subject:** Marathon Oil Company - 24 hour Report - Angell No. 1

Good evening,

At approximately 9:00 am, Operator reported standing fluids in containment due to a fire tube leak. The release was contained in containment, affecting a 30x30 ft area. Standing fluids are currently being recovered and estimate between 5-20 bbl oil was released. I will provide an update on the volume.

Callie
