Subject: RE: Chevron - North West Abo Unit Battery (RP-4930) - Delineation Workplan
Date: Thursday, July 19, 2018 12:03:19 PM

Dear Mr. Brunson:

Please note that the current RRALs are adjusted accordingly to 30 due to presence of water source < 1000 ft (20 points) and depth to groundwater being between 50-99 ft (10 points).

Based on preliminary laboratory summary results submitted, at this time NMOCD denies the proposed remediation plan due to exceeding TPH RRAL's in sampling locations SP1-SP7. Additionally, delineation is incomplete at sampling location SP7. Please complete delineation and resubmit an appropriate remediation plan for this release.

Thanks,

Christina Hernandez

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: Chevron - North West Abo Unit Battery (RP-4930) - Delineation Workplan

Olivia and Ryan,

Please find the attached Delineation Workplan and remediation proposal for the Chevron North West Abo Unit Battery (1RP-4930). Chevron is requesting that you review this plan and is looking forward to the OCD's and SLO's approval.

If you have any questions, please let me know.

Thanks, Cliff
