**Subject:** RE: Devon Falcon 32 State 1 Battery 1RP-4947 Closure  
**Date:** Monday, October 22, 2018 7:50:00 AM

---

Mr. Allen:

Please address NMSLO's concerns and clarify several comments in the closure report for 1RP-4947.

- How were TPH extended field tested?
- As stated in the email dated July 17, 2018, a scaled map with the locations of the confirmation sample locations was required in closure report.
- Tabulated data do not correspond with the laboratory reports.
- This closure report came after the revised 19.15.29 NMAC. The old C-141 form will not be accepted.

Thanks,  
Olivia

**Subject:** [EXT] RE: Devon Falcon 32 State 1 Battery 1RP-4947 Closure

Closure of 1RP-4947 is denied. Based on the photos provided in the closure report. I would appear that the battery has not been fully characterized. The entire battery displays signs of hydrocarbon staining, not just the excavated portions. This is now cover up with gravel. Please inform if this is not the case.
