Mr. Hohensee:

Please be advised that

1. Per 19.15.29.13 NMAC, regulations of corresponding agencies supersede NMOCD's.
2. Topographic maps appear to indicate a watercourse within 1000 ft. Southwest of the release location. Please verify upon conducting site/release characterization per 19.15.29.11 NMAC.
3. Dated, geo-referenced photo documentation for verification that the initial response activities have been employed to contain the release is requested.

The 1RP for this incident is

5243	10/22/2018	A	EOG	Vaca Lane line strike		24S-33E-36A	10/10/2018
-------------	------------	---	-----	-----------------------	--	-------------	------------

Please remember to include this 1RP identifier to all communications. Delineate and remediate per regulation. Mind the timelines for submittal of requisite information.

Please be advised that NMOCD recommends a completed site characterization/delineation report be reviewed or approved by NMOCD BEFORE any significant remediation work towards closure.

Thanks,
Olivia

Subject: [EXT] Line strike release
Date: Thursday, October 11, 2018 5:33:50 PM

Good afternoon, I am reporting a line strike that happened yesterday. A 4in poly PW line was struck releasing approx 65 bbls and 55 bbls were recovered. Berms were used to contain the majority of fluids. The location of the release is at 32.1808, -103.5189 on Vaca lane south of hwy 128. I will be submitting a c141 with more details soon.
