13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

- Devon Energy has contracted Talon/LPE to reclaim the closed drilling pit at the Gaucho No. 4, an active well location.
- The surface of the closed drilling pit area was bladed to prepare for the installation of a liner. Rock and debris were deep buried into the drilling reserve pit area.
- A composite 20 millimeter liner two hundred (200') feet long by two hundred (200') feet wide was installed over the closed drilling pit area. The edges of the liner was keyed a minimum of three 3-feet deep into a trench excavated at the boundaries of the closed drilling pit area.
- New top soil was transported to the location from a local borrow pit and placed over the top of the 20 millimeter liner with a 3-foot soil lift. The soil lift was contoured to match the surrounding terrain and was seeded on 7/9/12 using the recommended BLM seed mixture #2.
- Erosion control berms were installed to prevent storm waters from the east running across pit area.
