13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Yates Petroleum Corporation wishes to change a portion of the access road route to the Lusk AHB Federal #10H. This proposed change will allow an easier and safer road route for the trucks and equipment going to the rig. Also, it will shorten the surface disturbance for the new road going to the well location. The change in the road route will use existing surface disturbance by following an existing powerline corridor. Please note attached plats showing the proposed change to the access road route. Thank you.
