

O6 SWD, LLC
State AK SWD #1
1902 Tatum Hwy
Lovington, NM 88260

To whom it may concern:

06 SWD, LLC recently got a c-103 approved to pull the packer and tubing out of the hole, upon un setting the packer it was setting at 9136 ft.(exhibit 1), 06 SWD ran 40 joints of plastic coated L80 tubing. Upon completion of running the new tubing, the pulling unit crew tried setting the packer within 100 ft. of the perforation 9500-10151 ft that was originally noted in the historical paperwork that 06 obtained with the purchase of the disposal, the pulling unit was unsuccessful at getting a good seal(exhibit 2). The pulling unit was able to set the packer at 9129 ft with 289 joints of 2 7/8. (exhibit 3)

Thank you,

Beatrice Skaggs
