February 18, 2016

RE: New Mexico State #1, 30-025-3162

Gentlemen:

A C103 to re-complete the above mentioned well was submitted by Legacy Reserves Operating LP in July of 2014. To date the NMOCD has not received a subsequent report of the work being completed. This well has produced intermittently since late 2012.

If work has been done on this well, please submit the subsequent report. Otherwise, we would request that the casing leak described in the initial C103 be repaired and the well placed back on production or Plugged and Abandoned.

Please have the appropriate paper work submitted to this office within 30 days with work to begin within the next 90 days.

Respectfully,

Maxey G. Brown, District Supervisor
NMOCD, District I
