Multiple Leaks

Mr. Gonzales:

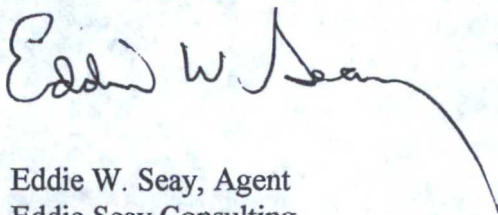

I was asked by the rancher, Mr. Angell, to identify and sample the area on the above listed well site and battery.

The well site had multiple points of contamination, at the well, tanks leaking, sale line leaking, and piles of contaminated soil placed off location, not on plastic. The well and battery is not fenced and cattle have been allowed to get into contaminants.

I have not found any C-141 as to the leaks or any work plan for the piles of soil.

I am asking if the OCD can get Butler to cleanup this area. Any help you can give will be appreciated.

Thanks,

RE: KEVIN BUTLER

Enclosed are the results of analyses for samples received by the laboratory on 06/21/12 10:20.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-11-3. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager
