13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

BLM Bond No. NMB001079

Surety Bond No. RLB0015172

Please see the attached C102 to revise the BHL of Matador's Biggers Federal 215H from 240' FSL and 990' FWL of Section 18 Township 25 South Range 35 East to 60' FSL and 1230' FWL of Section 18 Township 25 South Range 35 East. The BHL given represents the terminus of the well. The last perforation point will be 100' FNL and 1230' FWL lying within the NWNW of Section 18 Township 25 South Range 35 East.

The W2W2 of Section 18 T25S R35E and the E2W2 of Section 18 T25S R35E have uniform interests as the mineral estate in the objective formation and therefor the setback requirements do not apply to the eastern boundary line of the spacing unit. See NMAC 19.15.16.15(C)(7).
