**North El Mar Unit**  
**Temporarily Abandoned Wells**  
**Status Update**  
June 25, 2007

It is requested that Temporarily Abandoned status be continued for the temporarily abandoned wells in the North El Mar Unit, Lea County, New Mexico. Please refer to the Justification For Request For Temporarily Abandoned Status for these wells dated July, 2006.

The North El Mar Unit project keys off the nearby Cotton Draw Unit, Paduca Delaware Sand Unit CO<sub>2</sub> project, which has received regulatory approval, but has yet to be implemented due to a lack of CO<sub>2</sub> supply. We have remained in touch with POGO Producing Company regarding their progress at obtaining a CO<sub>2</sub> supply. Their negotiations continue and they hope to obtain a supply soon, but since all current supply is presently called for, they may be forced to wait for expansion of supply from Kinder-Morgan's McElmo Dome project. This could hopefully occur in 2008.

In the meantime, Sahara continues to try and repair these TA wells when they suffer from casing problems. We have recently completed repairs on wells NEMU #18 and NEMU #28. Both of these wells were successfully repaired.

It is considerably more costly to Sahara to repair rather than plug these wells; however, we consider preservation of these wellbores for future use to be critical to the viability of a CO<sub>2</sub> project in this field. Once a well has been plugged and abandoned, successful re-entry is by no means assured. While they are currently a financial and regulatory burden, we are convinced of the future need for these wells and believe that, were they to be P&A'd, the prospects for implementing a future CO<sub>2</sub> project would be severely impaired.

Sahara will file another status update on or before September 30<sup>th</sup>, 2007
