WELL "B"

August 23, 19 43

Well No. 26 is located 554 ft. from N line and 554 ft. from W line of sec. 23
NE/4 Sec. 23 173 123 N. 100.000'
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Lea New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the ground level above sea level is 3785.4 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill with rotary tools an 8200' test to the Abo formation. We plan to run and cement to surface approximately 200' of 13-3/8" OD casing. Also run and cement with 200 sacks approximately 1200' of 8-5/8" OD casing, with top of cement behind the casing at about 1150'. If commercial production is encountered will also run and cement 5-1/2" casing at producing depth.

All soft formations below 1200' will be cored and drill stem tested if deemed advisable.

Both sample log and electric log will be furnished upon completion of test.

Plan enclosed as prepared by registered and professional engineer.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
