OIL CONSERVATION COMMISSION
SANTA FE, NEW MEXICO

Roswell, New Mexico

December 26, 1961

(Place)

(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the.....

The Atlantic Refining Company B. C. Dickinson "B" Well No. 3 in M
(Company or Operator) Lease (Unit)
SW 1/4 SW 1/4 of Sec. 12, T. 15-S, R. 37-E, NMPM., Denton (Devonian) Pool
(40-acre Subdivision)
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

A Baker Model N Cast Iron Bridge Plug was set at 12,605' Wireline measurements and 18' of cement was dumped on top of this plug, thereby plugging off Devonian perforations. The Mississippian Zone - perforated 11,018-46', 11,057-62' GR with 4 JSPP. After a 2,000 gal acid treatment, the well produced 348 bbls of formation salt water in 33 hours with no trace of oil and a slight trace of gas by swabbing. We propose to temporarily abandon this well by setting a 25 sack cement plug from 10,930' to 11,070'. Pull all of tubing, leave well with Master Gate shut-in on wellhead. This plan to temporarily abandon was approved verbally by Mr. J. Ramey.

Approved....., 19.....
