The subject well was disconnected from Natural Gas Pipeline on December 21, 1984, due to excessive sales line pressure which restricted the well's producing ability. We sought and obtained a low pressure gas market delivery to Warren Petroleum Company. This change in gas transporter will greatly increase the well's producing ability and enhance revenues. Warren is in the process of obtaining right-of-ways and we do anticipate deliveries to re-commence approximately March 15, 1985.

If you have any questions, please contact Mr. J. M. Breeden at (505) 393-1781.
