(County or Subdivision)

New Mexico

(State or Territory)

Ground LevelThe elevation of the ~~well floor~~ above sea level is **3608.3** ft.**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to an approximate depth of 3200 feet to test the Yates Sand. We will run approximately the following casing string:

8-5/8" - 24# @ 300'. Cement to be circulated to surface.

5-1/2" - 14# @ 3200'. Cement with sufficient volume to return cement

above the top of the Salt. Cement volume to be determined by Caliper Survey.

Cement top to be verified by Temperature Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
