DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

U. S. GEOLOGICAL SURVEY
ARTESIA, NEW MEXICO

We propose to drill this well to an approximate depth of 9000', unless commercial production is obtained at a lesser depth.

We will run approximately the following casing program:

Surface: 300' of 13 3/8" casing with 200 sacks cement.

Intermediate: 2800' of 9 3/8" casing with 550 sacks cement.

Production: 9000' of 5 1/2" casing if production is found, with 300 sacks cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
