Wyatt-Phillips

Well No. **4** is located **1640** ft. from **N** line and **1640** ft. from **W** line of sec. **33**
173 (Twp.) **10** (Range) **New Mexico** (State or Territory)
Verdin (Field) **Lon** (County or Subdivision)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well has declined in production very rapidly in the past six months, a recent check shows the daily production being less than five barrels of crude oil.

We request authority to drill this well to a depth of 4310 feet, to the Maljamar Sands, setting a 5 1/2" liner from bottom of present oil string at 3675 feet to 4310 feet. Liner to be cemented in. Liner will be perforated at oil zone. Will sand frac well with 20,000 gallons Frac Oil and 20,000 pounds sand.

This request is made after our discussion with **OWNER** Engineer U.S.G.S. **John A. Frest.**

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
