### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to drill this well (Wyatt-Phillips #9) to a depth of approximately 4400 feet. This well will be topped in with rotary tools, and completed with cables tools.

Will run approximately 1400 feet of surface casing, cementing with 50 sacks of cement.

7" Casing will be set approximately 4000-4400 feet, at top of pay sand, cementing with 125 sacks cement.

This confirms our telephone conversation of October 29, 1954.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
