17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was drilled by Phillips Petroleum Company (Eilliams No. 5)
Abo test to TD of 8871 feet (Dry) in 1961.

In 1962 Phillips assigned this well to us as we were the operator of
shallow rights to 5500 feet. We made several attempts to complete well
in Grayburg and San Andres formations but all attempts failed and on
September 15, 1962, permission was given to temporally abandon well.
See attached report for detail of work performed.

We ask permission to drill out bridge plug at 4500 feet and cement plugs
at 4717 and 4570 feet, leaving TD of well 5145 feet and use hole as salt
water disposal well.

Casing in hole: 260' of 13 3/8, cemented to surface.
4593' of 8 5/8, cement back to 800 feet.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
