RE: 3160-9 #AJM-084-97

1. Please see attached copies of previous correspondence regarding change of operator.
2. Wells being placed on production delayed due to pulling units being unavailable to perform necessary pump changes and repairs. We've been on two company's waiting lists for over six months (verifiable through Dawson Production Services and CJS / Pinnacle Production Services in Artesia). Hope to have access to necessary equipment in the near future and wells will be back on production.
3. **PROCEDURE FOR RETURNING WELLS BACK TO PRODUCTION:** To our knowledge, the only repairs necessary to return the wells back to production are pump repair / changes. This "procedure" can be completed when a pulling unit is available as referenced in #2 above. Should other problems be found during the pump change process, they will be immediately addressed.

Please call Louis Fulton at (505) 365-6916, (505) 748-2621 or (505) 746-4787 with questions or to get updates.

Thanks.
