CONDITIONS OF APPROVAL

- a) Formation Producing Water - Yates
- b) Amount of Water Produced - After a series of problems which caused the well to be down for several weeks, we have tested the well and have determined that the water production is too small to measure. However, in the past, the wells have produced a small amount of water on occasion. We anticipate this trend will continue.
- c) Water Analysis - Since there is not enough water to measure, we cannot "catch" a sample for analysis at this time.
- d) Water Storage - Water is stored on lease in tank on location.
- e) Water Movement - Water is stored in tank until a full load is accumulated, and water is hauled from lease by an authorized transporter by tank truck or disposed into their approved disposal system.
