(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

"Carper-Divley" _____, 19 50
Well No. 0 is located 1700 ft. from N line and 600 ft. from E line of sec. 13
NE 1/4 SE 1/4 13 (1/4 Sec. and Sec. No.) T2S (Twp.) R3E (Range) NMPM (Meridian)
EK Queen (Field) Lea (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3975 ft. estimate

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to an approximate total depth of 4425' to test the Queen formation. We will run approximately 300' of 6 5/8" casing and circulate cement to the surface. We will run 5 1/2" casing to total depth and cement with 400 sacks of Pozmix cement 4% Gel and 125 sacks of neat cement. This well will be drilled with rotary tools and the sand section will probably be cored.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
