Well No. 15-13 is located 1900 ft. from N line and 3310 ft. from E line of sec. 13
SW 1/4 13 13N 33E 10W
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
E.K. Queen Los New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3900 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill this well to an approximate depth of 4400' to test the queen pay. 300' of 8-5/8" OD casing will be run and cemented back to surface. If production is encountered 5-1/2" OD casing will be run to total depth and cemented with 200 sacks of cement.

Rotary tools will be used.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
