Carper Drilling

December 26

1956

Well No. 8 is located 1980 ft. from N line and 660 ft. from W line of sec. 141/4 NE/4 14 18 S 33 E NMPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)E K Queen Lee New Mexico  
(Field) (County or Subdivision) (State or Territory)

G.I.

The elevation of the derrick floor above sea level is 3947 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to an approximate total depth of 4350' to test the Queen formation. We will run approximately 300' of 8 5/8" casing and circulate cement to the surface. We will run 5 1/2" casing to total depth and cement with 400 sacks Peemix 4% Gel and 125 sacks neat cement. This well will be drilled with rotary tools and the sand section will probably be cored.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
