Carper Drilling Co., Inc. July 15, 1955
"Sivley"
Well No. 3 is located 1900 ft. from N line and 1450 ft. from E line of sec. 24.
SW/4 NE/4 24 18 S 33 E NMPM
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
EK Queen Lee New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to an approximate total depth of 4400' to test the Queen formation. We will run approximately 250' of 8 5/8" casing and circulate cement to the surface. We will run approximately 4400' of 5 1/2" casing and run enough cement to cover the salt section. The hole will be drilled with rotary tools and we will probably core the sand section.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
