17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1708.

It is proposed to set a cast iron bridge plug above perforations (4690-4764') in the 5 1/2" casing in the San Andres section and dump cement on top of bridge plug to permanently abandon this section. It is then proposed to perforate the 5 1/2" casing in the Queen section from approximately 3890-3918' and sand frac this interval. Well will be tested following this remedial work.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
