NEW MEXICO OIL CONSERVATION COMMISSION

PACKER SETTING REPORT

I, **M. R. Dillon** , being of lawful age and having full
  Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by **Shell Oil Company** in the capacity of

Production Foreman , that on **August 26** , 19**69**

I personally supervised the setting of a **Baker - FH DG Hydrostatic Single String**
  Make & type of packer

in **Shell Oil Company** , **State A** ,
  Operator of well   **Hobbs Drinkard** *Lease name*

Well no. **7** located in the **Hobbs Blinebry** field,

Lea county, state of **New Mexico** , at a subsurface depth of

6552 feet, said depth measurement having been furnished me by

Tubing Tally ;

That the purpose of setting this packer was to effect a seal in the annular space between two

strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well,

of fluids produced from a stratum below the packer with fluids produced from a stratum above the

packer; that this packer was properly set and that it did, when set, effectively and absolutely seal

off the annular space between the two strings of pipe where it was set in such manner as that it

prevented any movement of fluids across the packer.
