

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

REQUEST FOR PERMISSION TO CONNECT WITH PIPE LINE

This request should be SUBMITTED IN TRIPLICATE. See instructions in the Rules and Regulations of the Commission.

Monument, New Mexico. December 10, 1938.

Place

Date

OIL CONSERVATION COMMISSION, Santa Fe, New Mexico.

DUPLICATE

Gentlemen:

Permission is requested to connect Amerada Petroleum Corporation State VA
Wells No. 5 in NW SW 1/4 of Sec. 22, T. 17s, R. 35e, N. M. P. M.,
Vacuum Field, Lea County, with the pipe line of the
Texas-New Mexico
Pipe Line Co. Address

Status of land (State, Government or privately owned)

Location of tank battery 1220' FWL and 1980' FSL 22-17s-35e

Description of tanks 2 High 500 Barrel National Wrought Iron

Logs of the above wells were filed with the Oil Conservation Commission December 9, 1938

All other requirements of the Commission have been complied with. (Cross out incorrect words.)

Additional information:

Total depth of this well is 4662'. Initial production was 139 barrels of pipe line oil in 11 hours through various chokes on 2 1/2" tubing. The daily gas rate was 145,440 cubic feet. The gas/oil ratio was 480/1.

RECEIVED DEC - 9 1938 RECEIVED HOBBS OFFICE

Yours truly,

Permission is hereby granted to make pipe line connections requested above.

Amerada Petroleum Corporation Owner or Operator

OIL CONSERVATION COMMISSION,

By A. ANDREAS State Geologist

[Signature]

By J. C. Lawrence

Position Superintendent

Date DEC - 9 1938

Address Monument, New Mexico.

THE POLITICAL ECONOMY OF POLYMERIZATION

Abstract: This paper discusses the political and economic aspects of polymerization in the context of the modern industrial revolution.

1. Introduction

The process of polymerization has revolutionized the way we live and work. It has led to the development of new materials and technologies that have transformed our lives. This paper will explore the political and economic implications of this process.

One of the key political issues surrounding polymerization is the control of the technology. Who owns the patents? How are they distributed? These are questions that have led to significant political and economic tensions.

Another major issue is the environmental impact of polymerization. The production and disposal of polymers have led to significant environmental problems, and there is a growing demand for more sustainable practices.

Finally, the economic impact of polymerization is also a major concern. While it has created many jobs and new industries, it has also led to the displacement of workers and the concentration of wealth in the hands of a few.

In conclusion, the political and economic aspects of polymerization are complex and multifaceted. It is a process that has shaped our world in profound ways, and it will continue to do so in the years ahead.
