(other) converted to a salt water disposal well

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The above well was approved by the NMOCD for conversion to a salt water disposal well by Order SWD-326 dated July 20, 1987. 2 3/8" plastic coated tubing and a packer were installed in the well on 8-11-87. The packer was set at 3376'. The annulus was tested to 500#. A copy of the pressure chart is attached.

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

I purchased the D&E Federal (a two well lease) and the R&B Federal (an offsetting lease with one well) in March, 1987. All of the wells are uneconomical or marginal due to the high cost of disposing of the produced water. Permission is requested to convert the D&E Federal #1 to a salt water disposal well in order that the other two wells can be produced economically. Injection will be through tubing and a packer set at ± 3430'. The estimated rate and pressure will be 56 BWPD at 695 psig. If the well will not take the water as it is currently completed, the OH interval will be deepened approximately 310'. An "Application for Permit to Deepen" is being submitted for this proposal.

A notice to offset operators, the surface owner, and a legal newspaper notice were submitted, as required by the State of New Mexico. Copies of these notices are attached.
