### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to plug and abandon this well by cementing a 25 sack plug over the perforations from 3326 - 3484, a solid cement plug thru the salt section and a 25 sack plug in the surface. All provisions on Order R-111-A will be complied with and your office and the potash operators will be notified in sufficient time to witness all operations.

And weighing not less than 10¢ per gallon shall be placed between all cement plugs and testing the location and hardness of each plug shall be witnessed by a representative of the USGS.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
