Well No. 1 is located 2310 ft. from N line and 990 ft. from XXE line of sec. _____

SW-NW 35 20S. 34 E. N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Lynch Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We will drill this hole with cable tools. We will set approximately 150 feet of 13-3/8" casing to protect the shallow water sands. We will then set 10-3/4" casing at approximately 800 feet and mud with Aquagel. We will then set approximately 1300 feet of 8-5/8" casing and mud with Aquagel. We will then set 5-1/2" oil string at approximately 3700 feet, and after pulling the 8", 10" and 13-3/4" pipe, we will cement this string to the surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
