MCALISTER FUEL COMPANY

PRODUCTION DEPARTMENT
MCALISTER FUEL COMPANY

MASSACHUSETTS
September 14, 1926

Mr. A. L. Foster
Secretary-Director
Oil Conservation Commission
Box 871
Santa Fe, New Mexico

Dear Sir:

McAlister Fuel Company requests permission to have gas produced with the
oil from our No. 1, A-2-P, 600' from south and east lines,
Section 24-1208-1222, Grant Field, Las Comas, New Mexico.

The initial gas-oil ratio was on this well August 2, 1926, was 225:1.
Subsequent tests since that date have ranged from 62 to 1010 cubic feet
per barrel.

We have contacted Phillips Petroleum Company and Fortran Basin Pipeline
Company relative to purchasing this gas, but so far, neither party is in-
terested in buying a quantity equal to this area at the present time.
We do not have any correspondence with Phillips or Fortran Basin Pipeline
Company, as all of our contacts have been made either personally or by phone.

Included in a list showing the well, surface area, other ownership, and
nearest gas connection.

Should there be any further information that you desire, please advise.

Very truly,
MCALISTER FUEL COMPANY

By _____
