The above well produces insufficient gas to flow without outside assistance. We request your permission to use input gas in the same from our Weir Lease, Well No. 7, located in SW 1/4 of SE 1/4 of Section 26-19s-36e, which has been shut in several months, of our own volition, due to the high gas oil ratio when produced.

In no event will more gas be used from Weir No. 7 than the maximum daily volume allotted wells in the Monument Area.
