8-5/8" 32# 8-thd. New Seamless casing was set in this well at 25408 and cemented by the Halliburton Method with 500 sacks of cement.

Casing and fittings were tested with 1200# pump pressure and allowed to stand undisturbed for thirty minutes. No drop in pressure resulted. The cement was then drilled out of casing and the same test of 1200# pressure again applied and allowed to stand undisturbed for thirty minutes. No drop in pressure resulted so the drilling was then resumed.
