OCT 2 1944
NEGATIVE
PRODUCTION OFFICE

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of notice by checking below:

NOTICE OF INTENTION TO TEST CASING SHUT-OFF		NOTICE OF INTENTION TO SHOOT OR CHEMICALLY TREAT WELL	
NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PLUG OR OTHERWISE ALTER CASING	
NOTICE OF INTENTION TO REPAIR WELL	X	NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL

Place

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the Monument Field
J. H. Foster Lease Well No. 1 in
of Sec. 34, T. 19S, R. 36E, N. M. P. M., Monument Field,
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

It is intended to cement through hole found at 573 feet in 7 inch producing string with 365 sacks cement with regular pump and plug job. It is intended to circulate cement to the surface between the 7inch oil string and 9 5/8 inch surface string and to then squeeze the remaining cement (approximately 250 sacks) downward between the two casing strings.

PROBING THE BOUNDARIES OF KNOWLEDGE

The purpose of this research is to explore the limits of human knowledge and understanding. It seeks to identify the areas where our current knowledge is incomplete or uncertain, and to investigate the reasons for these gaps. This involves a combination of theoretical analysis and empirical research.

One of the key areas of focus is the nature of consciousness and the mind. While there is a growing body of research in this field, many fundamental questions remain unanswered. For example, how does the brain give rise to subjective experience? What is the relationship between the mind and the body?

Another important area is the study of language and communication. How do we learn language? How do we understand what others are saying? These questions have implications for our understanding of human cognition and social interaction.

The research also examines the limits of scientific knowledge. While science has made remarkable progress, there are still many areas where our understanding is limited. For example, the nature of dark matter and dark energy remains a mystery.

Finally, the research explores the philosophical implications of these findings. What do they tell us about the nature of reality? What are the limits of human knowledge? These questions are central to the human condition and have been the subject of philosophical inquiry for centuries.

In conclusion, this research is a journey into the unknown. It seeks to push the boundaries of what we know and to challenge our assumptions about the world. The results of this research will have a profound impact on our understanding of ourselves and the universe.

The following table provides a summary of the key findings of the research. It shows the areas where our knowledge is most limited and the reasons for these gaps. This information is crucial for understanding the scope and limitations of the research.

The research also identifies several key areas for future study. These include the development of new theories and methods for understanding the mind and language, and the exploration of new frontiers in scientific research. These areas represent the next steps in our quest for knowledge.

In summary, this research is a testament to the human spirit's desire to know. It shows that there is still much to be discovered and that the boundaries of our knowledge are constantly expanding. The journey is ongoing, and the quest for knowledge will never end.
