

CONFIDENTIAL

NEW MEXICO OIL CONSERVATION COMMISSION

SANTA FE, NEW MEXICO

MISCELLANEOUS NOTICES

RECEIVED
DEC 1 6 1947
HOBBS OFFICE

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of notice by checking below:

NOTICE OF INTENTION TO TEST CASING SHUT-OFF		NOTICE OF INTENTION TO SHOOT OR CHEMICALLY TREAT WELL	
NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PULL OR OTHERWISE ALTER CASING	
NOTICE OF INTENTION TO REPAIR WELL		NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL		Notice of Intention to Plug Back	X

Monument, New Mexico

December 12, 1947

Place

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

CONFIDENTIAL

Gentlemen:

Following is a notice of intention to do certain work as described below at the _____

Amerada Petroleum Corporation J. R. Phillips Well No. 5 in NE 1/4 N 28E
Company or Operator Lease
of Sec. 1, T. 20S, R. 36E, N. M. P. M., Monument Field.
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

7227' Plugged Back Depth. We intend to plug well back with cement from 7227' to 5700'.

Approved DEC 1 6 1947, 19____
except as follows:

Amerada Petroleum Corporation
Company or Operator

By [Signature]

Position Asst. Dist. Supt.
Send communications regarding well to

Name Amerada Petroleum Corporation

Address Drawer D, Monument, New Mexico

OIL CONSERVATION COMMISSION,
By [Signature]
Title OIL & GAS INSPECTOR

QUESTION 1

1.1.1. The first part of the question is about the definition of a function. A function is a set of ordered pairs (x, y) such that for every x there is exactly one y. In other words, a function is a rule that assigns to each element of a set exactly one element of another set.

1.1.2. The second part of the question is about the domain and range of a function. The domain of a function is the set of all possible input values (x), and the range is the set of all possible output values (y). For example, if a function is defined by the equation $y = x^2$, then the domain is all real numbers and the range is all non-negative real numbers.

1.1.3. The third part of the question is about the graph of a function. The graph of a function is a set of points in a coordinate plane that represent the ordered pairs (x, y) of the function. The graph of a function must pass the vertical line test, which means that no vertical line can intersect the graph at more than one point.

QUESTION 2

2.1.1. The first part of the question is about the definition of a linear function. A linear function is a function whose graph is a straight line. The equation of a linear function can be written in the form $y = mx + b$, where m is the slope and b is the y-intercept.

2.1.2. The second part of the question is about the slope of a line. The slope of a line is a measure of its steepness and is defined as the ratio of the vertical change (rise) to the horizontal change (run). The slope of a line can be calculated using the formula $m = \frac{y_2 - y_1}{x_2 - x_1}$, where (x_1, y_1) and (x_2, y_2) are two points on the line.
