Mr. F. J. Vesely
Oil Conservation Commission
Carlsbad, New Mexico

Dear Sir:

Attached hereto find final reports on Ohio Fuel Supply Company-Anderson-Prichard Production Corp. State Well #1 located in C SW NW Section 2-20S-36E, Lea County, New Mexico.

Since we are not yet able to get proper forms for reporting tests of casing shut-off wish to take this means of advising that the 7" - 24# Seamless casing set at 3795' was tested with 1200# water pressure and showed a pressure decrease of one hundred pounds in thirty minutes, which we believe indicates a satisfactory job. The test was witnessed by Mr. J. W. Bradford, an employee of Fred Turner, Jr. on the south adjoining lease. Formal report of these tests will be forwarded to you when forms are available.

Yours very truly,

Frank Gray
