

NEW MEXICO OIL CONSERVATION COMMISSION
 Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of notice by checking below:

NOTICE OF INTENTION TO TEST CASING SHUT-OFF	<input checked="" type="checkbox"/>	NOTICE OF INTENTION TO SHOOT OR CHEMICALLY TREAT WELL	
NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PULL OR OTHERWISE ALTER CASING	
NOTICE OF INTENTION TO REPAIR WELL		NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL			

Hobbs, New Mexico
Place

March 19, 1937
Date

OIL CONSERVATION COMMISSION,
 Santa Fe, New Mexico.
 Gentlemen:

Following is a notice of intention to do certain work as described below at the _____

Repollo Oil Company W. P. Byrd Well No. 4 in NW/4
Company or Operator Lease
 of Sec. 11, T. 20S, R. # 36E, N. M. P. M., Monument Field,
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Set 199' of 12½" Casing at a depth of 218' on March 19th and cemented w/ 300 sacks

Red bed formation

Approved _____, 19____
 except as follows:

Repollo Oil Company
Company or Operator
 By L. Surrency
 Position Dist. Supt.
 Send communications regarding well to
 Name L. Surrency,
 Address Hobbs, N.M.

OIL CONSERVATION COMMISSION,
 By [Signature]
 Title _____

PHYSICS 551

PHYSICS 551 is a course in quantum mechanics. It covers the basic principles of quantum mechanics, including wave mechanics, matrix mechanics, and the theory of angular momentum. The course is designed for students who have completed a course in classical mechanics and are interested in the foundations of quantum physics.

PHYSICS 551: QUANTUM MECHANICS

The course begins with a review of classical mechanics and the transition to quantum mechanics. It then covers the wave function, the Schrödinger equation, and the interpretation of quantum mechanics. The course also discusses the theory of angular momentum, the harmonic oscillator, and the hydrogen atom. The final part of the course deals with the theory of scattering and the Dirac equation.

Prerequisites: PHYSICS 431, PHYSICS 432, and PHYSICS 433.

The course is taught by Professor [Name], who has a Ph.D. in Physics from the University of Chicago. He has published several papers in the field of quantum mechanics and has been a member of the faculty at the University of Chicago for many years. The course is held in the Physics Department building, and the lectures are held in the lecture hall. The course is open to students in the Physics Department and to students from other departments who are interested in quantum mechanics.

The course is a required course for students in the Physics Department who are interested in the foundations of quantum physics. It is also a recommended course for students in other departments who are interested in quantum mechanics. The course is held in the Physics Department building, and the lectures are held in the lecture hall. The course is open to students in the Physics Department and to students from other departments who are interested in quantum mechanics.
