(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Lead B-33 No. 9

Hobbs, New Mexico April 25, 1955

Well No. 9 is located 660 ft. from N line and 660 ft. from E line of sec. 35

23 (1/4 Sec. and Sec. No.) 23 (Twp.) 23 (Range) 11 (Meridian)

Hobbs (Field) Hobbs (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a total depth of approximately 4030' with rotary tools in an attempt to obtain commercial production in the Penrose. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing patterns: 8 5/8" casing to be set at 1450' and cemented with approximately 1,400 sacks cement, cement to be circulated; 5 1/2" casing to be set at total depth and cemented with 625 sacks cement, or as determined by survey, and to be perforated opposite the pay zone. Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
