Re: Zone Segregation Test
State A-17 #3-L
Sec. 17, T19S, R37E
Eunice Monument GB/SA & Eumont

Gentlemen:

Our records indicate that both zones in the above well have been shutin since mid 1986. No packer leakage test was submitted in 1986. Even though both zones are shutin we still need verification of no crossflow between zones. If you have pressure on one zone and zero on the other that is sufficient verification.

Please submit some form of zone segregation test on this well.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I
