September 11, 1935.

Mr. F. J. Vesely
State Oil & Gas Inspector
Carlsbad, New Mexico.

Dear Sir:-

I wish to obtain permission to save Braden Head gas on the Harvey Culp Well #1, which is located in the NE/4 of the NW/4 of Section 19-19-37. This is for purposes of operating the lease.

We propose to run 150-Sax cement on the 7" String of Casing.

Please advise if this procedure is alright.

Yours truly,

By _____
