

In re: Application of Phillips Petroleum Company for  
Approval of a Non-Standard Gas Proration Unit  
and Dual Completion of its Land Office Well  
No. 1, Lea County, New Mexico  
New Mexico Oil Conservation Commission  
December 10, 1954  
Page No. 2

Our Land Office Well No. 1 is presently producing oil from the Grayburg formation having been completed in December, 1935. The 7 inch production casing is set at 3786 feet with 200 sacks of cement. The well is also cased with 259 feet of 13 3/8 inch surface pipe and 1313 feet of 9 5/8 inch casing. No remedial work has been performed on this well since completion. We propose dually completing this well by perforating in the Yates, Seven Rivers and Upper Queen sands as shown on the attached diagrammatic sketch.

We kindly request your prompt consideration of this application.

Yours very truly,

L. E. Fitzjarrald
