Oil Conservation Division
P. O. Box 1980
Hobbs, NM 88240

Attention: Mr. Jerry Sexton
District Director

Gentlemen:

We respectfully request an exception to Administrative Order MC-2343 to eliminate a requirement of the 1979 annual packer leakage test on our Land Office No. 1. Well location is Unit K, Sec. 18, 19-S, 37-E.

This confirms your telephone conversation with Mr. Joe Woodson of the Hobbs Plant Office regarding the problems of restoring the Eunice Monument (GB/SA) oil zone, a pumping completion, to production after shut-in periods. As requested of Mr. Woodson, we enclose pressure charts of the Grayburg producing zone which were taken on May 28 and May 29 during a period when the upper flowing zone (Eumont Gas) was shut in for processing plant maintenance down time.

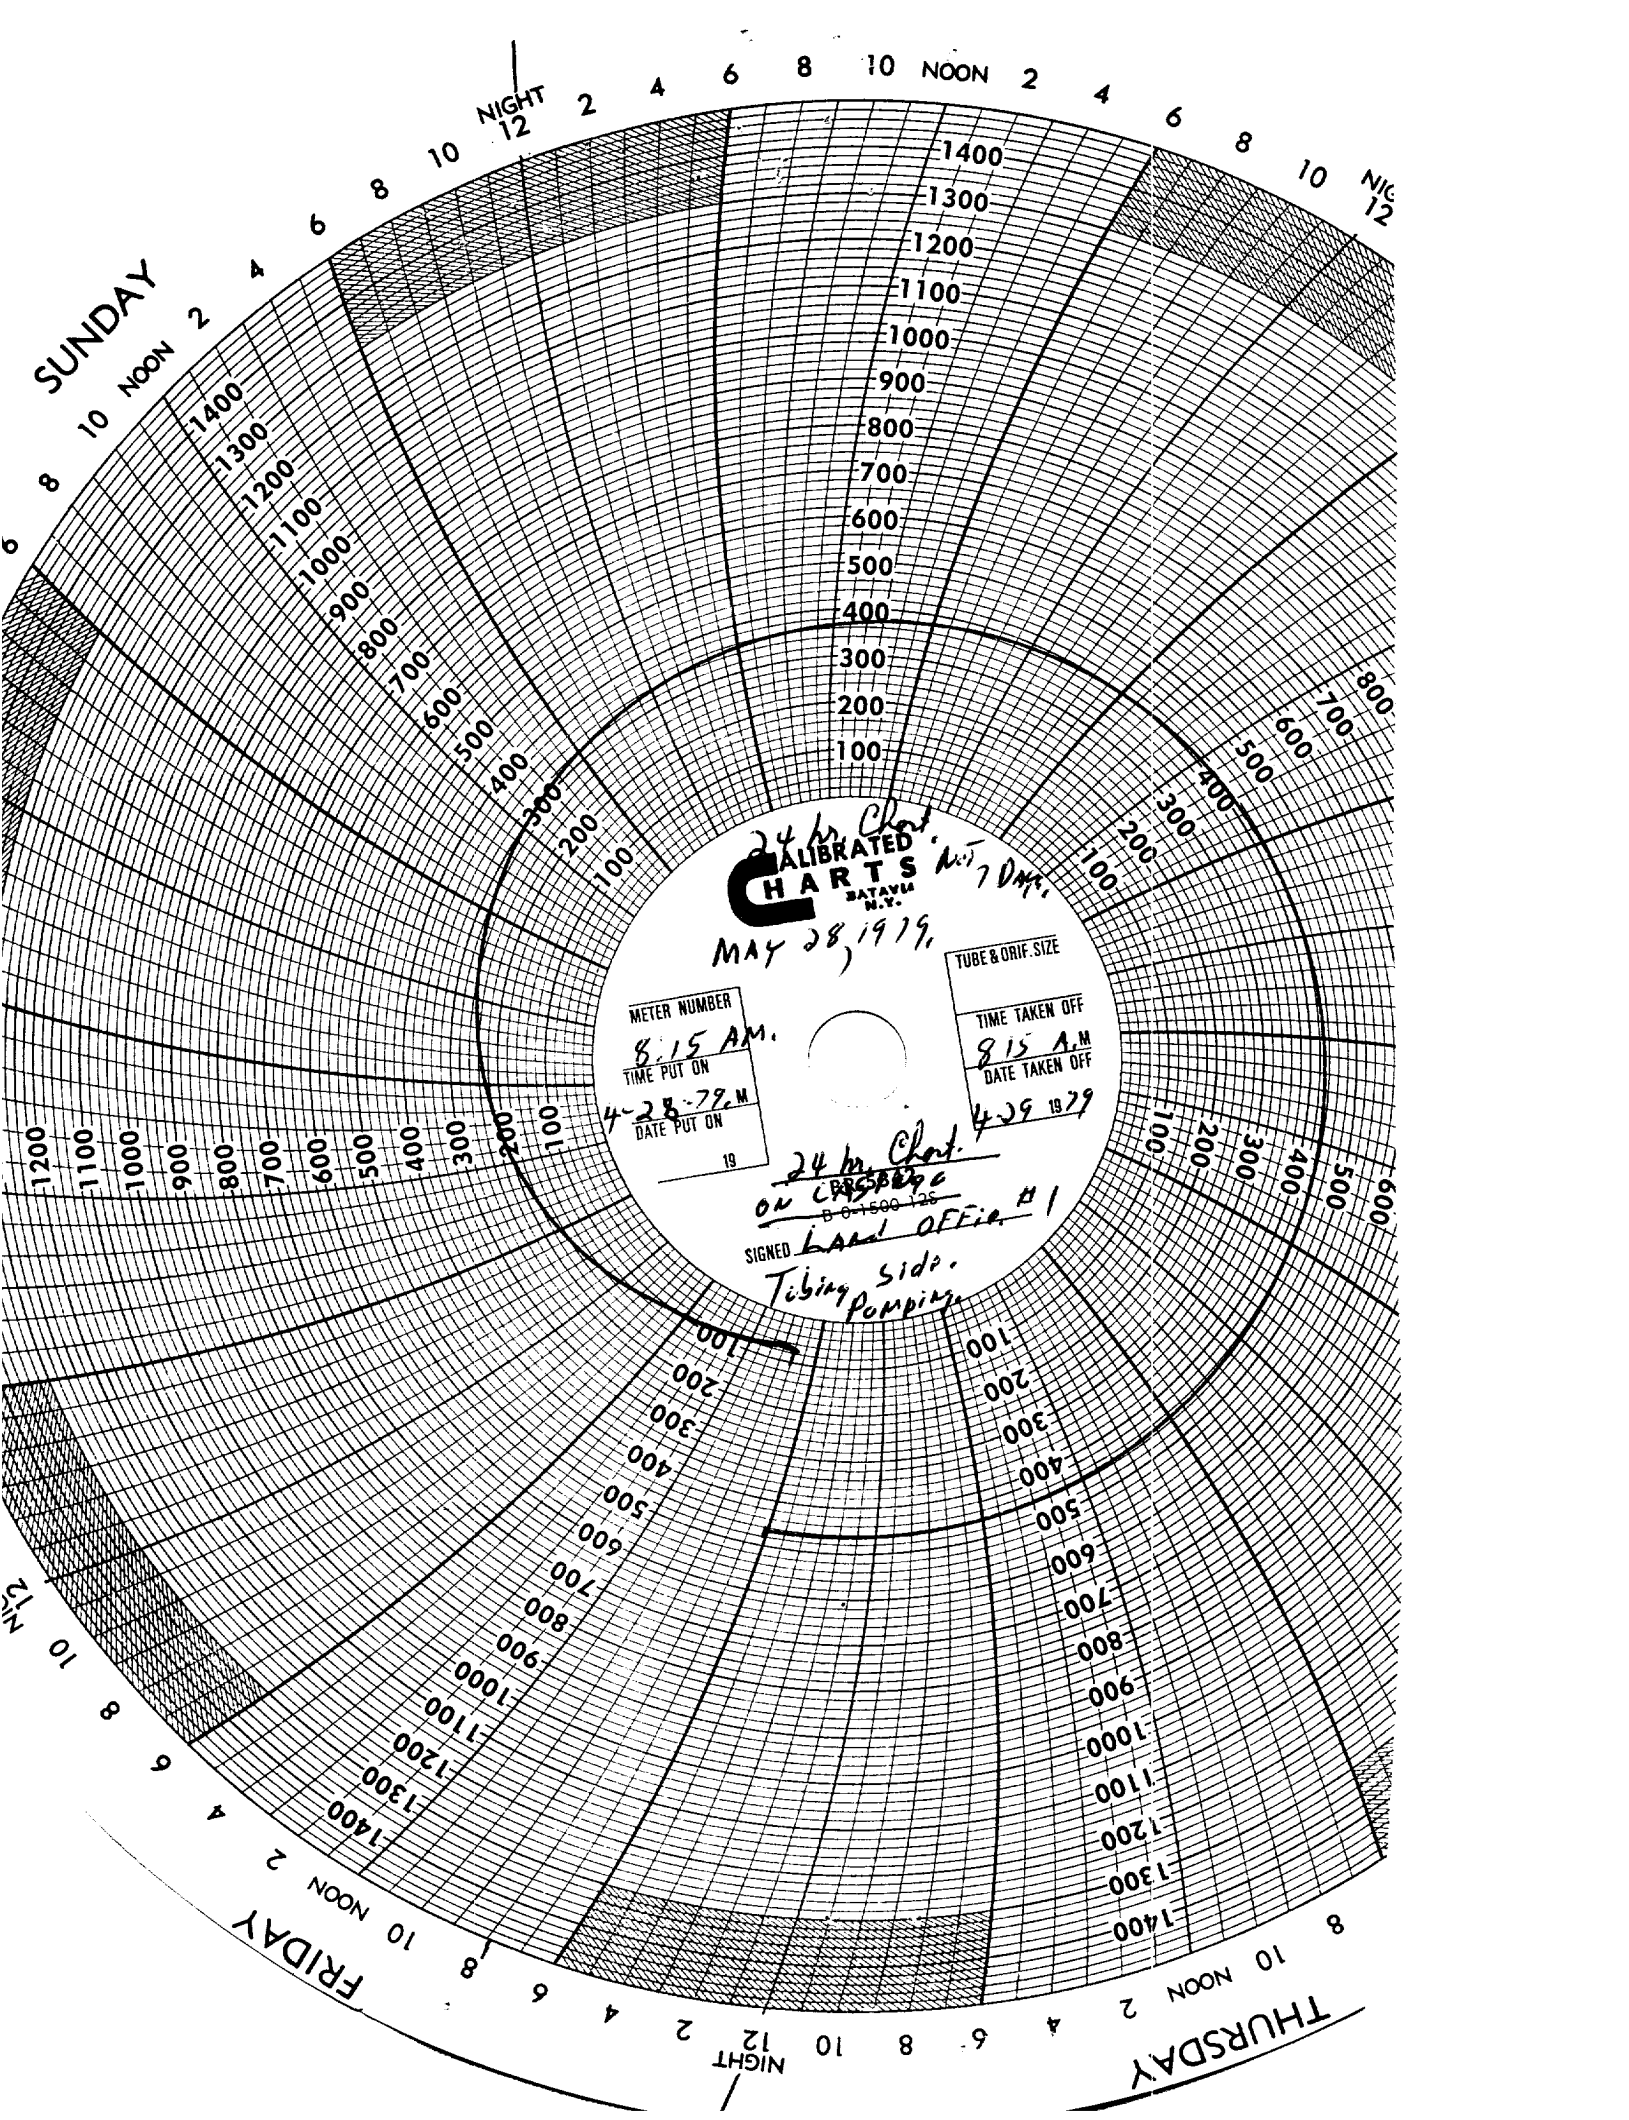

We trust Mr. Woodson's explanation and the enclosed charts sufficiently establish non-communication between zones such that this exception may be granted.

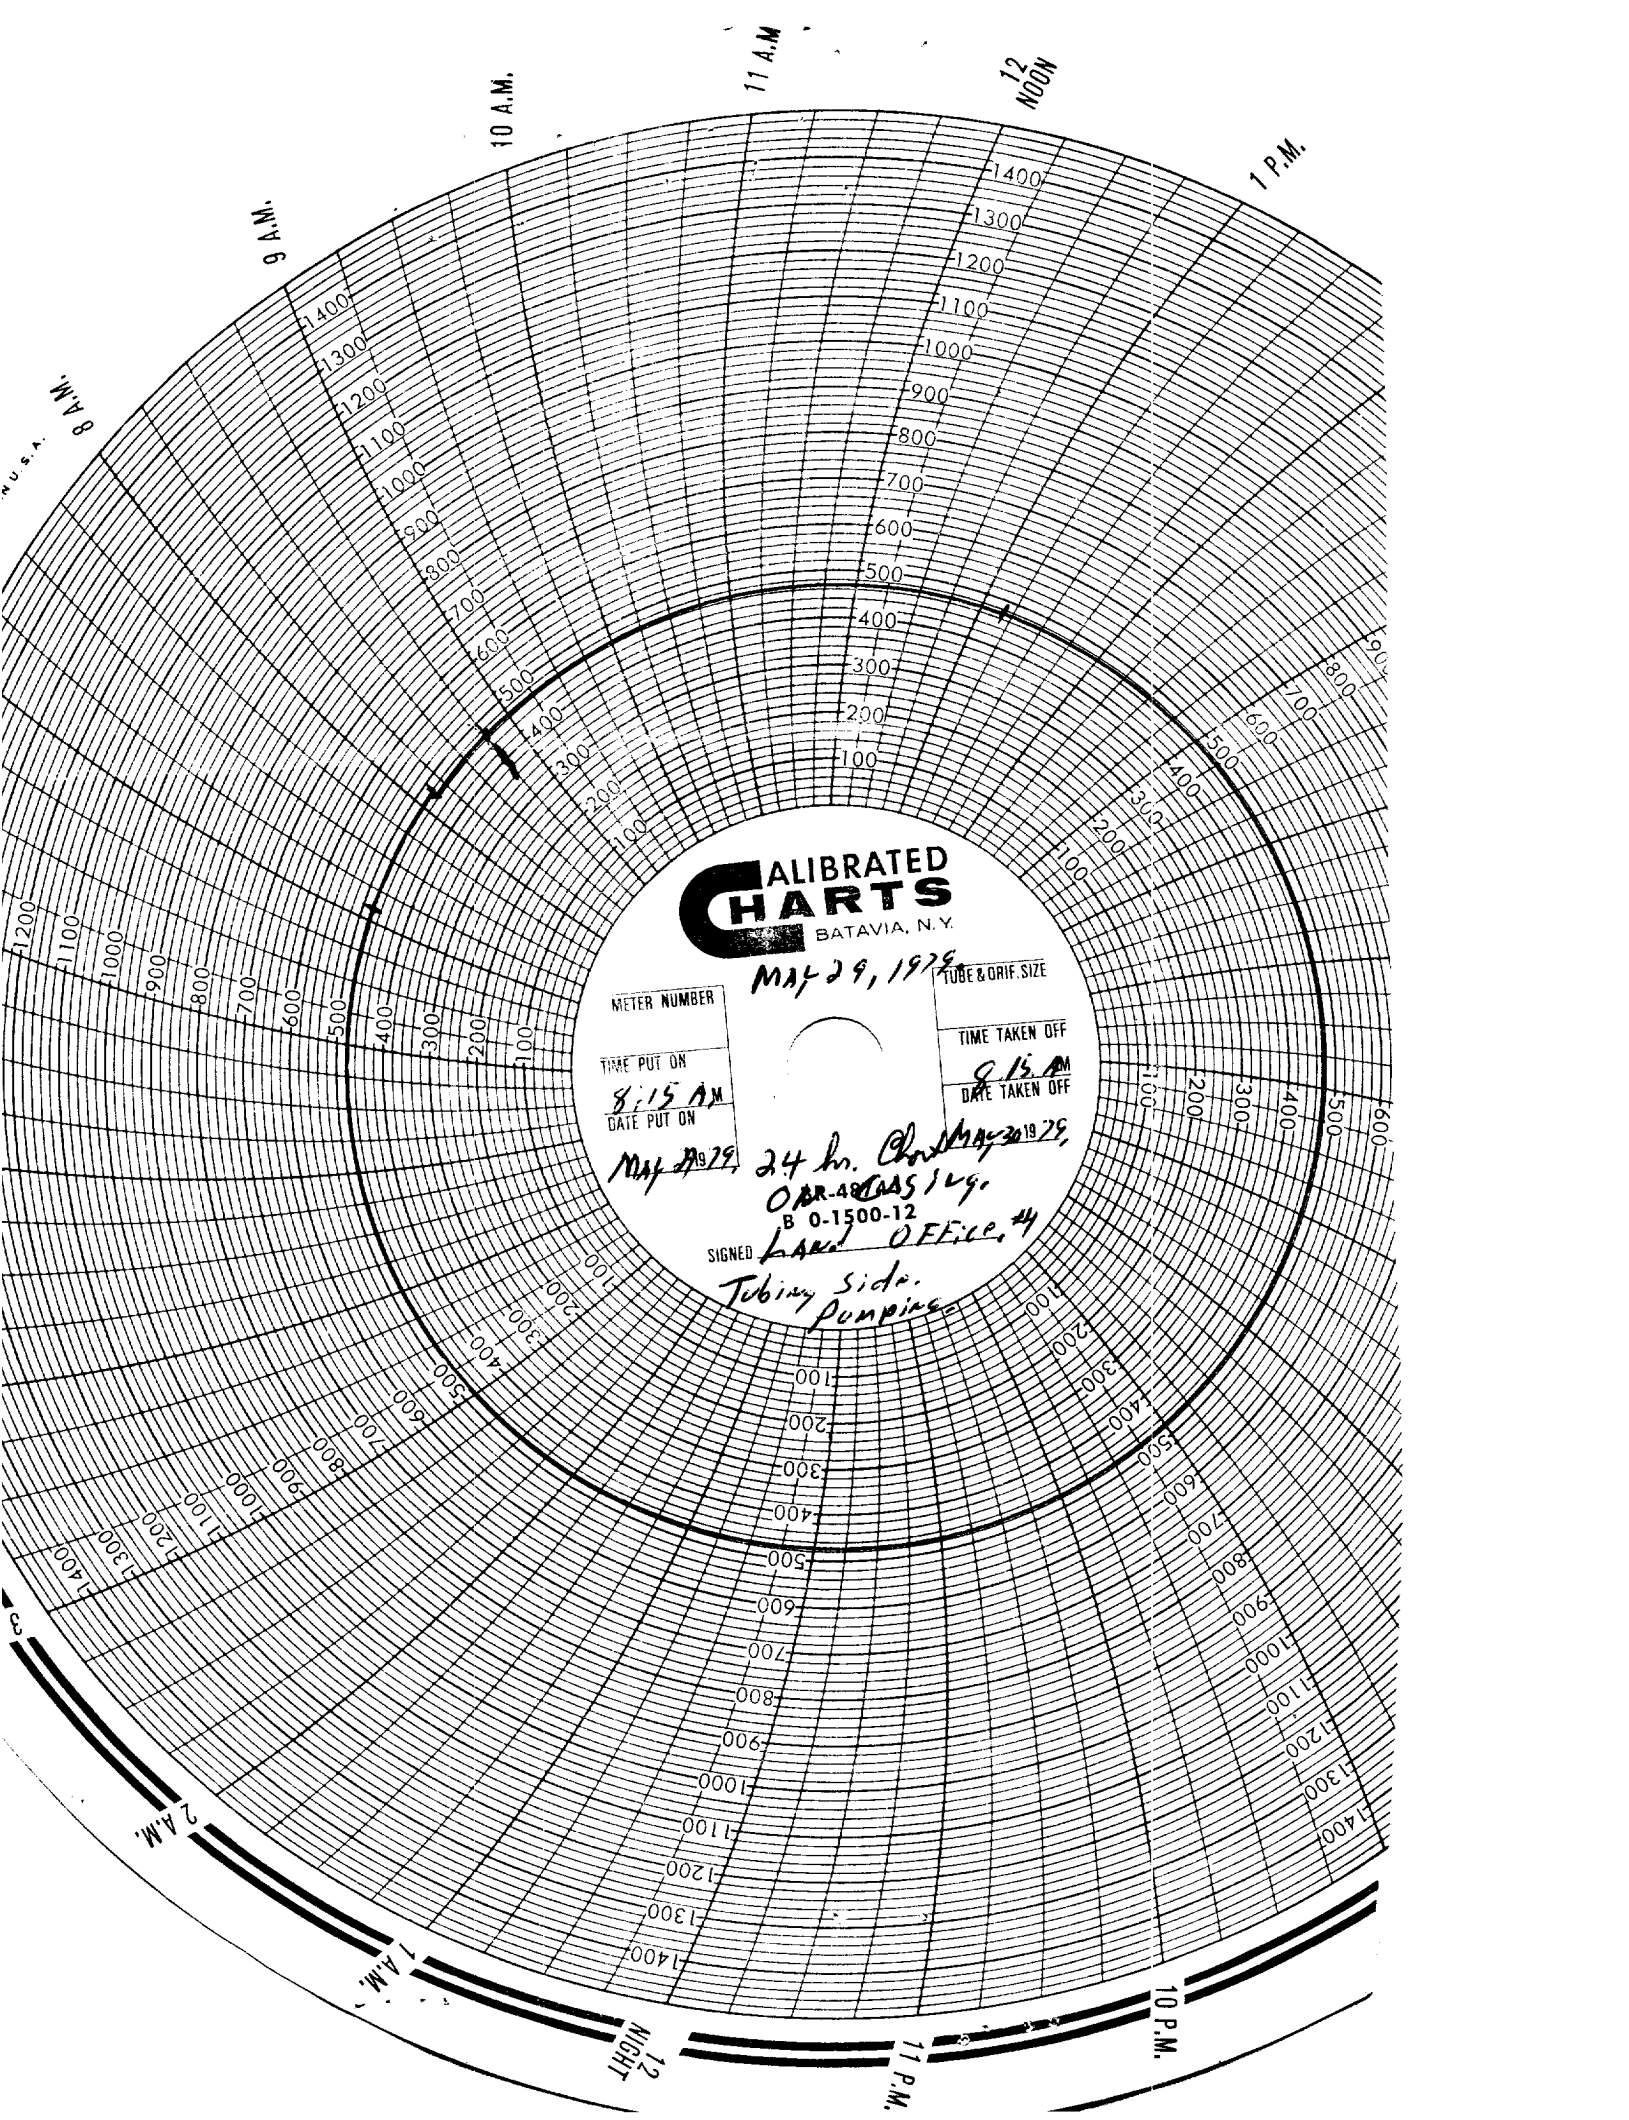

Very truly yours,

T. Harold McLemore
Area Regulation and
Proration Analyst

INSTRUCTIONS

1. Is this gas well a dual completion? Yes X No. _____.
2. If the answer to Question 1 is Yes, are there any other dually completed wells within the dedicated acreage?
Yes _____ No. X.

A separate plat must be filed for each gas well, outlining the area dedicated to such well and showing the location of all other wells (oil and gas) within the outlined area.

Mail in duplicate to the district office for the district in which the well is located.
