

N. MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL	XXXX	REPORT ON PULLING OR OTHERWISE ALTERING CASING

THEORY OF THE EARTH AND ITS HISTORY

CHAPTER I. THE EARTH AND ITS HISTORY

The Earth is a planet of the solar system, and its history is the history of the solar system. The solar system is a system of celestial bodies, including the Sun, the planets, and the moons, which are held together by the force of gravity. The Sun is the central body of the solar system, and it is the source of the energy that powers the planets. The planets are the bodies that orbit the Sun, and they are the objects that we see in the sky. The moons are the bodies that orbit the planets, and they are the objects that we see in the sky. The history of the solar system is the history of the Earth, and it is the history of the life on Earth.

CHAPTER II. THE EARTH AND ITS HISTORY

THE EARTH AND ITS HISTORY

- The Earth is a planet of the solar system, and its history is the history of the solar system.
- The solar system is a system of celestial bodies, including the Sun, the planets, and the moons, which are held together by the force of gravity.
- The Sun is the central body of the solar system, and it is the source of the energy that powers the planets.
- The planets are the bodies that orbit the Sun, and they are the objects that we see in the sky.
- The moons are the bodies that orbit the planets, and they are the objects that we see in the sky.
- The history of the solar system is the history of the Earth, and it is the history of the life on Earth.

THE EARTH AND ITS HISTORY

The Earth is a planet of the solar system, and its history is the history of the solar system. The solar system is a system of celestial bodies, including the Sun, the planets, and the moons, which are held together by the force of gravity.
