THEORY OF THE EARTH

CHAPTER I. OF THE ORIGIN OF THE EARTH.

The origin of the earth is a subject which has attracted the attention of philosophers from the earliest ages. The ancients were divided into two schools, the one of which held that the earth was created out of nothing, and the other that it was formed out of pre-existing matter.

SECTION I. OF THE CREATION OF THE EARTH.

The first question which presents itself is, whether the earth was created out of nothing, or whether it was formed out of pre-existing matter. The former opinion is held by the ancients, and is supported by the authority of the sacred scriptures.

The latter opinion is held by the moderns, and is supported by the authority of the philosophers. They contend that the earth was formed out of a chaos of matter, which was organized by the power of God.

The former opinion is supported by the authority of the sacred scriptures, and the latter by the authority of the philosophers. The former opinion is the more ancient, and the latter the more modern.

The former opinion is supported by the authority of the sacred scriptures, and the latter by the authority of the philosophers.

The former opinion is supported by the authority of the sacred scriptures, and the latter by the authority of the philosophers. The former opinion is the more ancient, and the latter the more modern.

SECTION II. OF THE FORMATION OF THE EARTH.

The second question which presents itself is, whether the earth was created out of nothing, or whether it was formed out of pre-existing matter.

The former opinion is held by the ancients, and is supported by the authority of the sacred scriptures. The latter opinion is held by the moderns, and is supported by the authority of the philosophers.

SECTION III. OF THE ORGANIZATION OF THE EARTH.

The third question which presents itself is, whether the earth was created out of nothing, or whether it was formed out of pre-existing matter.

The former opinion is held by the ancients, and is supported by the authority of the sacred scriptures. The latter opinion is held by the moderns, and is supported by the authority of the philosophers. The former opinion is the more ancient, and the latter the more modern.

The former opinion is supported by the authority of the sacred scriptures, and the latter by the authority of the philosophers.

SECTION IV. OF THE HISTORY OF THE EARTH.

The fourth question which presents itself is, whether the earth was created out of nothing, or whether it was formed out of pre-existing matter.

The former opinion is held by the ancients, and is supported by the authority of the sacred scriptures.

The latter opinion is held by the moderns, and is supported by the authority of the philosophers.

SECTION V. OF THE FUTURE OF THE EARTH.

The fifth question which presents itself is, whether the earth was created out of nothing, or whether it was formed out of pre-existing matter.

The former opinion is held by the ancients, and is supported by the authority of the sacred scriptures.

The latter opinion is held by the moderns, and is supported by the authority of the philosophers.

The former opinion is the more ancient, and the latter the more modern.

The former opinion is supported by the authority of the sacred scriptures, and the latter by the authority of the philosophers.

The former opinion is supported by the authority of the sacred scriptures, and the latter by the authority of the philosophers.

The former opinion is the more ancient, and the latter the more modern.

The former opinion is supported by the authority of the sacred scriptures, and the latter by the authority of the philosophers.
