THEORY OF THE STATE

THE STATE AND THE NATION

The state is a political organization that exercises authority over a defined territory and its population. It is characterized by a monopoly on the legitimate use of force. The nation, on the other hand, is a community of people who share a common identity, history, and culture. The relationship between the state and the nation is complex and often contentious.

In the modern world, the state and the nation are often seen as synonymous. However, there are many cases where the two do not align. For example, there are states that encompass multiple nations, and there are nations that do not have their own state.
