Re: Continental Oil Company  
Application for authority  
to effect a Monument oil-  
Eumont gas dual completion  
on its State C-30 well No. 1  
located in Section 30, T19S,  
R37E, Lea County, New Mexico;  
and for approval of a 160-acre  
non-standard gas proration  
unit consisting of the NW/4  
Section 30, T19S, R37E.

Gentlemen:

Continental Oil Company respectfully requests admin-  
istrative approval under the provisions of statewide rule 112-A  
to dually complete in the Monument oil pool and Eumont gas pool  
its State C-30 well No. 1 located 660 feet from the North line  
and 1980 feet from the West line of Section 30, T19S, R37E,  
NMPM, Lea County, New Mexico. A plat attached hereto shows  
the manner in which the dual completion is proposed to be  
accomplished. The Eumont gas will be produced through the  
casing-tubing annulus while Monument oil is being produced  
through the tubing. The fluids from the two reservoirs will  
be completely separated by appropriate packers, and the well  
will be so equipped that the reservoir pressure of each of  
the two pools may be determined separately. Well head equip-  
ment will include all necessary connections to permit accurate  
measurement of fluids produced by each pool as may be required  
by the Commission.

We further respectfully request approval under the  
provisions of Rule No. 5 (b) of the Special Rules and Regula-  
tions for the Eumont Gas Pool of Order No. R-520 of a 160-acre  
non-standard gas proration unit consisting of the NW/4 of the  
said Section 30 to be allocated to the said well No. 1. In  
support of this request we should like to point out that the  
proposed unit conforms with the requirements of said Rule 5
