

**NEW EXICO OIL CONSERVATION COMMISSION**  
**Santa Fe, New Mexico**

**MISCELLANEOUS REPORTS ON WELLS**

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	<b>X</b>	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

**Hobbs, N.M.,**

**April 13th, 1936.**

Place

Date

OIL CONSERVATION COMMISSION,  
 Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the  
**Continental Oil Company State C-30** Well No. **1** in the  
 Company or Operator **NW/4** Lease **30** T. **19-S** R. **37-E**, N. M. P. M.,  
 Monument of Sec. **30**, Field, **Lea** County.

The dates of this work were as follows: **April 12, 1936.**

Notice of intention to do the work was (was not) submitted on Form C-102 on **19**

and approval of the proposed plan **XX** (was not) obtained. (Cross out incorrect words.)

**DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED**  
**State C-30 #1, total depth 3915', Lime, on April 8, 1936.**

**5½" OD casing was set at 3894' and cemented with 150 sacks.**

**On April 12, 1936, pipe was tested with 1200# pressure for 30 minutes before drilling plug. After drilling plug, pipe was again tested with 1200# pressure for 30 minutes. Pipe tested OK.**

Witnessed by **B. Florence,** Foreman **The Texas Company**  
 Name Company Title

Subscribed and sworn to before me this **24**

day of **April**, 19**36**

*Patricia Manning*  
 Notary Public

My Commission expires **Oct. 24, 1939.**

I hereby swear or affirm that the information given above is true and correct.

# THEORY OF THE EARTH AND ITS HISTORY

## CHAPTER I. THE EARTH AND ITS HISTORY

The Earth is a planet of the solar system, and its history is the history of the solar system. The solar system is a system of celestial bodies, including the Sun, the planets, the moons, and the comets, which are all bound together by the force of gravity. The Sun is the central body of the solar system, and it is the source of the energy that powers the planets. The planets are the bodies that orbit the Sun, and they are the most prominent members of the solar system. The moons are the bodies that orbit the planets, and they are the most prominent members of the planetary systems. The comets are the bodies that orbit the Sun in highly elliptical orbits, and they are the most prominent members of the solar system. The history of the solar system is the history of the formation and evolution of these celestial bodies, and it is a subject of great interest to scientists and the general public alike.

### THE EARTH AND ITS HISTORY

1

The Earth is a planet of the solar system, and its history is the history of the solar system. The solar system is a system of celestial bodies, including the Sun, the planets, the moons, and the comets, which are all bound together by the force of gravity. The Sun is the central body of the solar system, and it is the source of the energy that powers the planets. The planets are the bodies that orbit the Sun, and they are the most prominent members of the solar system. The moons are the bodies that orbit the planets, and they are the most prominent members of the planetary systems. The comets are the bodies that orbit the Sun in highly elliptical orbits, and they are the most prominent members of the solar system. The history of the solar system is the history of the formation and evolution of these celestial bodies, and it is a subject of great interest to scientists and the general public alike.
