6-5/8" 20# 10-thd. New Seamless casing was set in this well at 3779' and cemented by the Halliburton Method with 100 sacks.

Casing and fittings were tested with 1200# pump pressure and allowed to stand undisturbed for thirty minutes. No drop in pressure resulted so the casing was then drilled out of the casing and the same test of 1200# pump pressure again applied and allowed to stand undisturbed for thirty minutes. No drop in pressure resulted so the drilling was then resumed.
